The nervous system

The nervous system controls everything you do: Thinking, walking, talking, etc. The nervous system is made up of the **brain, spinal cord and nerves.**

Brain and nerves

The most important part of the nervous system is the **brain.** This organ is inside your head and is protected by the **skull.**

The brain receives different types of information from the sense organs (ears, tongue, skin, eyes and nose) through the **nerves.**

The brain reads the signals sent by the sense organs. Then it sends messages back to different parts of the body.
