

Name: _____

What is a Community?

A community is a place where people live, work, and play together. Communities have a lot of things in common. They all have buildings, businesses, transportation, and people. They also all have natural characteristics like grass and trees, but some communities even have rivers, lakes, or oceans by them.

All communities have a location that

you can find on a map. They can

also be different sizes! Some

communities are very big and

others are very small. Some

communities have lots of people

and loud noises, while other communities

have fewer people and can be very quiet.

1. What is a community?

2. What natural characteristics can you find in communities?

3. Are all communities the same size? Why would a community be a different size from another community?
