

# GIRAFFES

Giraffes are big animals that live in Africa. They are yellow and brown and they are very tall. An adult giraffe can be more than 5 meters tall. A baby giraffe is 2 meters tall. Baby giraffes can run when they are only 24 hours old. Adult giraffes can run fast – 60 kilometers per hour. This is important because lions eat giraffes. Giraffes are vegetarians. They eat the leaves of tall trees. They can also see very well. Giraffes like to live in groups with 10 or more other giraffes. They live for 25 years but some giraffes only sleep 10 minutes each day!

1. Adult giraffes are more than 5 meters tall.
2. Baby giraffes can run after 24 hours.
3. Adult giraffes can run 60 kilometers per hour.
4. Giraffes can live for 25 years.
5. Some of them only sleep for 10 minutes each day.
