

Which production department function do you think was responsible for the following scenarios:

Scenarios	Production Function
<div></div> <p>Design and testing of the Starbucks latest non-dairy range?</p>	
<div></div> <p>Ensures products are good quality?</p>	
<div></div> <p>Ensures there is enough input for production and output for distribution?</p>	

Maintains and repairs the production line?

Making changes to the old iPhone 5 to the new iPhone 12?

Helps you with any problems you may have after buying the product?
