TOPIC: TYPES & COMPONENTS OF A COMPUTER SYSTEM 10

Yr Level:	Subject: ICT	Unit:
Name :		Date:

Complete each statement by filling in the blanks.

A) Computer systems are made up of two parts: ▯▯▯▯ and software.

B) Hardware is a ▯▯▯▯ object that can be touched and picked up.

C) The ▯▯▯▯ is used to plug all other components into the system. It uses a ▯▯▯▯ to allow components to communicate.

D) The ▯▯▯▯ is known as the 'brains' of the computer. It carries out processing and turns data into ▯▯▯▯.

E) Computer hardware is useless without ▯▯▯▯ as it needed to give out instructions.

F) There are two types of software called application software and ▯▯▯▯.

G) A computer that has a full size keyboard and monitor and is usually found in the home is known as a ▯▯▯▯ computer.

H) Hardware such as a mouse and keyboard are used to get data into the computer and are known as ▯▯▯▯ devices.

I) Once data has been entered into the system it is passed to the CPU for ▯▯▯▯.

J) Once data has been processed, the results are passed onto an ▯▯▯▯ device such as a monitor or printer.

K) ▯▯▯▯ is permanent memory that is used to store ▯▯▯▯ that are needed to start up the computer.

L) ▯▯▯▯ is fast temporary memory that is used to store data and applications that are currently in use. It is sometimes also called ▯▯▯▯ memory.
