

### Theme 5: Matter and materials- Listening Practice -2

Listen to the song and fill in the missing lyrics with words from the table.

solid	rising	liquid	freezing	matter	molecules	steam	heat
Melting	cooled	ice	suddenly	gas	boiling	increase	vapor

Everything is made of \_\_\_\_\_ Solid, liquid or gas,  
Matter can move from one state to another, sometimes really fast.

Solid, liquid & gas you see,  
Are states of matter changed by \_\_\_\_\_  
\_\_\_\_\_, boiling and freezing points,  
Heat moves \_\_\_\_\_ where it wants.

\_\_\_\_\_ is a solid, and then a liquid,  
When temperatures \_\_\_\_\_  
The heat keeps \_\_\_\_\_, before you know it,  
It disappears into \_\_\_\_\_.

Solid, liquid & gas you see,  
Are states of matter changed by heat.  
Melting, \_\_\_\_\_ and freezing points,  
Heat moves molecules where it wants.

Water is a \_\_\_\_\_ that turns to vapor when exposed to heat.  
Add \_\_\_\_\_ temperatures You'll see a solid  
As \_\_\_\_\_ appears on the scene.

Solid, liquid & gas you see,  
Are states of matter changed by heat,  
Melting, boiling and freezing points,  
Heat moves molecules where it wants.

Vapor is a \_\_\_\_\_ that turns to liquid,  
When \_\_\_\_\_ to extremes, if the mercury keeps falling.  
The liquids gonna form ice \_\_\_\_\_

Solid, liquid & gas you see, are states of matter changed by heat,  
Melting, boiling and freezing points, heat moves molecules where it wants.
