

Suicide

Health & Family Life

Name: _____ Grade: 7

Suicide: When someone intentionally takes their own life.

Depression: A deepened state of sadness.

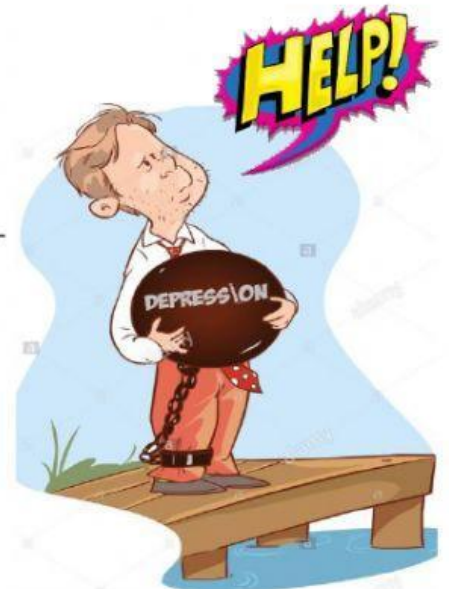

When people commit suicide, they do so to escape pain or suffering. When someone ends their own life, we say that they "died by suicide." A "suicide attempt" means that someone tried to end their life but did not die.

Some signs of suicide include change in behavior, cutting yourself, and talk of dying. When people commit suicide, they don't really want to die they simply believe that there is no other way.

To help suicidal people it is important to get help: talk to a trusted adult, a psychiatrist, and a teacher or counsellor.

Instructions: Write the **WORD** from the **bracket()** in the word box. For the **multiple choice** write the correct **LETTER** in the **box**.
