

Unit: 3 Lesson:1 Slow Change

Drag and Drop

1- Some of the ways that caused erosion or weathering:

2- We can see erosion in nature in:

3- Example of slow change to Earth's landscape.

4- Weathering changes some properties of rocks

Mark the following statements True or False

Fast change happens over many years. **T F**

Water can change the shape and size of rocks. **T F**

Tiny grains of sand cannot cause big change. **T F**

The only way that caused weathering and erosion is water **T F**

The water turns to brown when erosion happened because it carries ice **T F**

Give two examples of Slow change to Earth's landscape:

1.....

2.....

Good Luck 😊
