3. Look at the sentences in exercise 2 and answer the questions.

1. Are we talking about the present, the past or the future?

   _____

2. Do the sentences express plans, daily routine, or predictions?

   _____

3. How do you form the affirmative and negative forms?

   Affirmative: _____

   Negative form: _____

4. write the words in the correct order.

a. be / world / the / will / cleaner

   _____

b. longer / will / live / people

   _____

c. population / increase / the / will

   _____

d. enough / won't / food / there / be

   _____

e. floods / more / be / there / will

   _____

f. cut / trees / we / down / fewer / will

   _____

5. Read the article and choose the correct option, A, b, or C.

LIVEWORKSHEETS

The Three Rs of Rubbish

In the last 50 years people have used more resources than in the rest of history and we're destroying our planet in the process. We will have to change so that life can continue. Renewable energy will help to reduce pollution, but there are many things we can do as individuals. What exactly do we need to do?

Reduce - We reduce when we buy and use less! Ideally in the future we will buy durable products. At the moment, electronic devices such as TVs, computers and fridges have a short life. We throw them away and buy new ones. This creates pollution. Before buying something new, ask yourself - do you really need it? Before throwing something away, ask if there's another option.

Reuse - When we reuse an item many times, we reduce the amount of rubbish. When you go shopping, take bags with you to use many times. Buy rechargable batteries and avoid buying items (like paper plates) that have only one use. When your clothes are old, take them somewhere for other people to use.

Recycle - Recycling extends the life of products that we no longer need. Many materials, such as plastic, paper, cardboard, metal and textiles, can be recycled and made into other things. In the future, we won't be able to put anything into landfill and we will have to reuse or recycle everything.

We live in a world where people buy and throw away easily. We need to change these bad habits and to focus on the three Rs - Reduce, Reuse and Recycle!

1. What is wrong with electronic devices?

A. They only last a few years.
C. They use electricity
b. They are durable goods.

2. How can we reduce the problem of rubbish?

A. Use disposable items.
b. Don't buy disposable items.
C. Buy things every day.

3. What is a benefit of reusing items?

A. We will reduce the amount of rubbish.

b. We will wash more plates.

C. We will make more rubbish.

Glossary
destroy = destruir
disposable = desechable
rechargable batteries = baterías recargables
landfill = vertedero

4. When we recycle ...

A. the item is made into something else.
C. we throw everything into landfill.

b. the material isn't reused.

5. The three Rs of rubbish are ...

A. refuse, reduce and recharge.
b. reduce, reuse and remove.
C. reduce, reuse and recycle.

6. Complete the sentences with the words in the box.

LIVEWORKSHEETS

disposable goods	durable products	electronic devices	landfill
pollution	rechargeable batteries	recycle	renewable energy

a. Solar and wind power are types of _____ .

b. _____ will last longer and so help reduce rubbish.

c. Computers, TVs and washing machines are all types of _____

d. In the future, we won't be able to send any items of rubbish to _____

e. We should buy _____ to avoid throwing them away.
