

# Jerarquía de operaciones

Nombre del alumno: \_\_\_\_\_ Grupo: \_\_\_\_\_

| Operación                                                                                       | Resultado |
|-------------------------------------------------------------------------------------------------|-----------|
| $7 \cdot 3 + [6 + 2(2^3 \div 4 + 3 \cdot 2) - 7 \cdot \sqrt{4}] + 9 \div 3 =$                   |           |
| $\sqrt{5^2 - 3^2} \cdot (2^2) + \sqrt[3]{8} \cdot \sqrt{81} \div 18 \cdot \sqrt{18 \times 8} =$ |           |
| $22 \div (5 - 1^3 + 9 - 14 \div 7) =$                                                           |           |
| $[4(4^2) - 2^2] \div (4^2 - 4) =$                                                               |           |
| $\sqrt{13^2 - 12^2} + (6 - 4)^2 \times 8 - \sqrt{(10 - 8)^2} =$                                 |           |
| $3(2 \cdot 4^3) \div 4 =$                                                                       |           |
| $12^2 \div \sqrt{16} \div \sqrt{81} + 5^2 \cdot 6 \div 3 =$                                     |           |
