

## Guided Practice

1. Find the sum. Write in simplest form.

$$\begin{aligned}2\frac{3}{6} + 2\frac{1}{6} &= \underline{\quad} + \underline{\quad} + \frac{3}{6} + \underline{\quad} + \underline{\quad} + \frac{1}{6} \\&= (\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad}) + \left(\frac{3}{6} + \frac{1}{6}\right) \\&= 4 + \frac{\boxed{\quad}}{\boxed{\quad}}, \text{ or } \boxed{\quad}\frac{\boxed{\quad}}{\boxed{\quad}}\end{aligned}$$
