**Unit 5: Lesson 1 What Is the Water Cycle?**

**Quiz (M)**

❖ Write the letter of the best answer in the text box after each question.

1. Water moves between Earth's surface and the air through a process called the \_\_\_\_\_.

- a. air cycle
- b. water cycle
- c. rock cycle

2. \_\_\_\_\_ is the change from a liquid to a gas.

- a. Condensation
- b. Precipitation
- c. Evaporation

3. The students in Ms. Sarah's class hope to see snow this winter. Snow is a kind of \_\_\_\_\_.

- a. condensation
- b. precipitation
- c. Evaporation

4. What is the main source of energy that drives the water cycle?

- a. cloud
- b. sun
- c. wind

5. \_\_\_\_\_ is the change of a gas into a liquid.

- a. Condensation
- b. Precipitation
- c. Evaporation

6. Water that is stored underground is called \_\_\_\_\_.

- a. run-off
- b. groundwater
- c. water vapor

7. Use the **word box** to **label** the stages of the water cycle.

Precipitation	Condensation	Evaporation
---------------	--------------	-------------

The sentences below show the steps that lead to the formation of a cloud.

Number the steps to place them in the proper order.

\_\_\_\_ Water vapor cools and condenses around tiny particles.

\_\_\_\_ Water is heated by the sun.

\_\_\_\_ Water evaporates into the air.

\_\_\_\_ Billions of water droplets join together.
