There were times when only lucky (удачливые) children lived with a teddy bear in their houses. In those days, bears did not often see their bear friends.

Rufus was a teddy bear. He lived with a little girl in a beautiful house. The girl was a Lady. Yes, she was a Lady because her mother was a Duchess (герцогиня).

Once a Duchess had a party. And the teddy bears wanted to have a party, too/

They invited all the bears that (которые) lived in town. They cooked a tasty meal, made a chocolate cake and set the table in the forest. Many bears came with apples, apricots and honey. After the dinner, many bears went to dance. They danced and sang. It was wonderful. One little bear did not go to dance. He washed the dishes.

Suddenly he saw a very big bear. It was a real bear. The real bear asked, "Have you got any food here?"

"No," said the little teddy bear.

"Excuse me (извините) it is my birthday and I want to have a birthday cake. Do you have a cake?"

"No, we haven't. But we had a chocolate cake."

"I am so sorry," said the real bear sadly and went away.

Next day (на следующий день) the teddy bears went to the forest and gave the real bear a tasty chocolate cake. He was happy!
