Задание 2. Установите соответствие тем 1—6 текстам A—E. Занесите свои ответы в таблицу. Используйте каждую цифру только один раз. В задании одна тема лишняя.

1. **An outdoor hobby**
2. **How to motivate**
3. **An active hobby**
4. **Importance of hobbies**
5. **Create anything**
6. **A young scientist**

A. Children tend to imitate adults. So, you can generate his interest to some activity by setting a personal example. When a child watches a grown-up doing something fun and creative, he is more likely to join in. Another way to help children choose a hobby is taking him to explore interesting places like museums, collector's studios, art galleries, plays, and concerts. He will not only learn new things but also discover his area of interest.

B. A hobby can help children become confident, self-reliant, and independent. Having a hobby also strengthens the thinking skills of kids. A hobby not only develops qualities like team spirit, compassion, and patience but also teaches various life skills.

C. Arts and crafts hobbies can be a wonderful way of feeding a child's imagination and giving a healthy channel to his creativity through fun activities. Some of the arts and crafts hobbies include origami, woodwork, knitting, drawing and many others.

D. Kids may enjoy taking up gardening as a hobby. Together with the chance to dirty their hands while working with mud children can watch an absolute magic. A small seed gives birth to a flower or a bush or even a big tree.

LIVEWORKSHEETS

E. Meteorology is the study of weather. It can be a great hobby for kids and can also make an interesting career choice. Adults can give a child illustrated books about climate and weather or he can browse online as well. He may also try to learn facts from TV programmes.

Задание 5. Прочитайте текст вслух. У вас есть полторы минуты на подготовку и полторы минуты, чтобы прочитать текст вслух.

The solar system is made up of all the planets that orbit our Sun. In addition to planets, the solar system also consists of moons, comets, asteroids, minor planets, dust and gas. Everything in the solar system turns around the Sun. The Sun is so large that its power pulls all the other objects in the solar system towards it. At the same time, these objects, which are moving very quickly, try to fly away from the Sun into the space.
