

Learning Target: I can identify and explain the different types of chemical reactions

Learning Target: I can explain how the different types of chemical reactions demonstrate the law of conservation of mass/energy.

Types of Chemical Reactions 101 Video Notes

Scan QR Code for Video

1. What are the four types of chemical reactions? _____

2. What is a synthesis reaction? Give an example of it below. _____

3. What is a decomposition reaction? Give an example of it below. _____

4. What is a single replacement reaction? Give an example of it below. _____

5. What is a double replacement reaction? Give an example of it below. _____

Learning Target: I can identify and explain the different types of chemical reactions

Learning Target: I can explain how the different types of chemical reactions demonstrate the law of conservation of mass/energy.

6. Fill in the following table:

Type of Reaction	Definition	Equation
<i>Synthesis</i>		
<i>Decomposition</i>		
<i>Single Replacement</i>		
<i>Double Replacement</i>		

Quiz Review Part 1

1. Occurs when one element replaces another one in a compound _____
2. Two or more elements or compounds combine to make a more complex substance _____
3. Occurs when different atoms in two different compounds trade places _____
4. Compounds break down into simpler substances _____

Quiz Review Part 2

1. $AB + CD \rightarrow AC + BD =$ _____
2. $A + B \rightarrow AB =$ _____
3. $AB \rightarrow A + B =$ _____
4. $AB + C \rightarrow AC + B =$ _____

Learning Target: I can identify and explain the different types of chemical reactions

Learning Target: I can explain how the different types of chemical reactions demonstrate the law of conservation of mass/energy.

Quiz Review

1. $P_4 + O_2 \longrightarrow P_2O_3 =$ _____
2. $CF_4 + Br_2 \longrightarrow CBr_4 + F_2 =$ _____
3. $BaS + PtF_2 \longrightarrow BaF_2 + PtS =$ _____
4. $HgO \longrightarrow Hg + O =$ _____
