

READING AND VOCABULARY

Name: _____

I.D#: _____

Some hospitals specialize in particular conditions like cancer or psychiatric illness. Other hospitals specialize in particular types of patients like geriatrics, children or the terminally ill. However, the best known type of hospitals is the general hospital which deals with almost everything, has ambulance crews and beds for both intensive care and long stay.

A big general hospital has many different specialist departments. Identifying departments can be confusing because different hospitals use different names for the same thing. For example, one hospital may have a 'children unit' which a different hospital calls 'Paediatrics'. Accident and Emergency (A&E) in one hospital is called 'Casualty' in another.

There are many other examples. The department that specializes in heart problems, is sometimes called "Coronary Care". Others call it "Cardiology" or "Cardiovascular medicine". Nephrology, the department that treats illnesses of the kidney is sometimes called "The Renal Unit". Gastroenterology (digestive system) is sometimes "The Department of Hepatology".

Hospital staff often use abbreviations for departments. For example, they refer to "Obs and Gynae". This is a department combining Obstetrics (pregnancy), and Gynecology (women's reproductive organs). They call Otolaryngology, "ENT" (ears, nose & throat), mostly because it is much easier to say.

VOCABULARY

Find terms in the text that mean the same as the following

The first one is done for you.

- a) mental health problems psychiatric illness
- b) elderly people _____
- c) people who are dying _____

Professor Mixila Vega

**Columbus
University**

- d) paramedics _____
- e) treatment for critically ill patients _____
- f) stomach and intestines _____
- g) uterus, ovaries, and fallopian tubes _____

FURTHER VOCABULARY PRACTICE

Match department names 1-6 with parts of the body a-f

Department name

- 1. Coronary Care
- 2. Gynecology
- 3. Obstetrics
- 4. Gastroenterology
- 5. ENT
- 6. Nephrology

Parts of the body

- a. tonsils
- b. cervix
- c. bowel
- d. heart
- e. kidneys
- f. placenta
