

# ŠKOLSKO NATJECANJE IZ ENGLESKOG JEZIKA

za 8. razred osnovne škole

ŠKOLSKA GODINA 2017. / 2018.

---

Zaporka: \_\_\_\_\_

(zadana riječ)

## TEST

Čitanje s razumijevanjem:	6 bodova
Uporaba jezika:	54 boda
Ukupno:	60 bodova

**Task 1 – Reading Comprehension.**

You are going to read a text about President Obama's visit. For numbers **1 – 6** decide whether the statements are true or false. Write only **T** for **true** or **F** for **false**. There is an example at the beginning **(0)**. Write your answers on the Answer Sheet.

President Barack Obama decided to surprise students at McKinley Technology High one Friday, by dropping in unexpectedly. To make the surprise even better, Obama casually walked in and asked the class, "How's everybody doing? Is that my seat? You don't mind me crashing, right?" Needless to say, nobody minded. Obama's spokesman Keith Schiller revealed that the former president was at McKinley to talk to students about "their life goals, pursuing higher education and giving back to their communities." More importantly, Obama is apparently "focused on supporting the next generation of leaders. Today's meeting is part of that ongoing conversation with young people."

Even though he's not in office anymore, Obama is intent on ensuring America's young people are educated, informed, and inspired. Obama also shared news of the visit on his own social media accounts.

In the video posted to Instagram, Obama tells the group of students, "One of the things that I did throughout my presidency was I'd meet with groups of young people everywhere I went. Whether it was here in the United States, or when I was traveling overseas, just to kind of hear from them, find out what they're interested in. Because I do believe that most of the problems that we have are going to be solved by you."

Obama's faith in young people is inspiring, and it's a reminder that despite not being the president anymore, he'll never stop advocating for America.

**President Obama's first name is Donald.**

**(0) F**

Students at McKinley Technology High knew President Obama would visit them.

**(1) \_\_\_\_\_**

Obama asked if he could demolish a chair.

**(2) \_\_\_\_\_**

He came to school to talk to students about their life plans.

**(3) \_\_\_\_\_**

Obama's spokesman shared news on the former president's social media accounts.

**(4) \_\_\_\_\_**

Obama used to meet young people both in America and abroad.

**(5) \_\_\_\_\_**

Young people are motivated by his faith in them.

**(6) \_\_\_\_\_**

**(6 points)**

**Task 2 – Verb tenses.**

Read the text. For numbers 1 – 10, choose the correct answer – **A, B, C, or D**. There is an example at the beginning **(0)**. Write your answers (only **A, B, C, or D**) on the Answer Sheet.

The idea that girls **(0)** **A** difficulty with maths is a common stereotype and there **(1)** \_\_\_\_\_ sheets of statistics showing girls getting poorer results than boys in science and maths. But what's the reason? Are boys really better at these subjects?

According to some scientists there are slight genetic differences between both sexes at birth which **(2)** \_\_\_\_\_ influence the subjects boys and girls choose. But the difficulty is that, by the time children **(3)** \_\_\_\_\_ school age, there are so many other influences that it is almost impossible to tell whether girls are worse at science and maths, or whether they **(4)** \_\_\_\_\_ to think of these subjects as unfeminine.

In maths at least, girls are equal to boys. A London University report suggests that girls **(5)** \_\_\_\_\_ studying maths because of social attitudes. While it is socially unacceptable for people **(6)** \_\_\_\_\_ to read and write, it is still acceptable for women to say that they are thick at maths. Although girls get marks which are as good as the boys, they **(7)** \_\_\_\_\_. We need to get rid of sexual stereotypes and the views that maths and science are masculine subjects.

There is no doubt that sexism does exist in Britain's classrooms. A government report on maths teaching **(8)** \_\_\_\_\_ that teachers seem to give more attention to the boys than the girls. When girls **(9)** \_\_\_\_\_, teachers did not like it. When boys did this, they were seen as **(10)** \_\_\_\_\_ bright and a leader.
