

CHAPTER 2: ECOSYSTEM

SUBTOPIC 2.3: INTERACTION BETWEEN ORGANISMS

1. Fill in the blank with the correct answer.
 - a) An interaction that **benefits both organisms**.
 - b) An interaction that **only benefit one organism** but **harms** the other.
 - c) An interaction which **benefits one organism without harming** or **benefitting** the other.
 - d) This interaction happens when two or more organisms of different species live closely together and interact with one another.
 - e) Barnacles get free ride and access to plenty of food by attaching to the whales without harming the whales. Name this interaction.
2. Match the diagram below with the correct interaction.

parasitism

mutualism

Prey-predator

competition

commensalism
