

Math Problem 1

INSTRUCTIONS

1. Watch the video before you do this worksheet.
2. Follow the problem-solving steps.
3. When you are finished, submit the worksheet.
4. If you get all the answers correct, you are a champion at using this Math strategy! Well done!
5. If you made some mistakes, watch the video again and then try the worksheet again.

This is the problem:

Sara went to the supermarket. She bought 12 apples and 7 pears. How many pieces of fruit did she buy altogether?

1. If I use the **CUBES** strategy, what information should I circle?
 - A. All the words starting with the letter s.
 - B. The question
 - C. The picture.
 - D. The numbers.
2. If I use the **CUBES** strategy, what should I underline?
 - A. Underline the numbers.
 - B. Underline the names.
 - C. Underline the question.
 - D. Do not underline anything.

3. Which words tell me that I have to **add** the numbers?

- A. fruits
- B. apples and pears
- C. altogether
- D. buy

4. These are some of the strategies you can use to solve the problem. Match the picture to the strategy.

A. I can draw a picture and count.

$$12 + 7 = \underline{\quad}$$

B. I can use a number line to add.

C. I can write a number sentence.

D. I can use mental math.

5. Solve the problem of paper and then enter your answer below in the number sentence.

+

Sara bought _____ pieces of fruit altogether.

7. How can you check that your answer is correct? Choose all the correct answers.

- A. There is no need to check my answer.
- B. I can check if $19 - 7 = 12$ or if $19 - 9 = 7$
- C. I can check if I added correctly in my picture.
- D. I can re-do the calculation to see if I get the same answer.

If you get all the questions correct, you can try to solve Problem 2.

If you did not get all the questions correct, watch the video again and then try to answer this worksheet again.
