

FACTUAL REPORT ASSIGNMENT

Grade XI/ II

Choose the best answer.

Text 1. The Sun

The Sun's surface temperature is around 5500 degrees Celsius (9941 degrees Fahrenheit). The Sun's core is around 13600000 degrees Celsius. The average distance from the Sun to the Earth is around 150 million kilometers. Light from the Sun reaches Earth in around 8 minutes.

Because of the Sun's huge influence on Earth, many early cultures saw the Sun as a deity or god. For example, Ancient Egyptians had a sun god called Ra while in Aztec mythology there is a sun god named Tonatiuh. (<http://contohbahasainggris.com/factual-report>)

1. What is the Sun ?
A. A star B. A planet C. A part of Solar System D. A Core
2. What can be concluded from the Sun ?
A. The Earth is smaller than it
B. The Earth is bigger than it
C. The Sun's diameter is the same with the Earth.
D. The Sun's diameter is not wide.
3. Light from the Sun reaches the Earth in.... minutes.
A. 6 B. 7 C. 8 D. 9
4. It can be inferred that :
A. The Sun's surface temperature is around 500 degrees Celsius.
B. The Sun's core is around 1360 degrees Celsius.
C. The average distance from the Sun to the Earth is around 1 million kilometer.
D. Light from the Sun reaches Earth in not more than 10 minutes
5. What is right about the text in paragraph 3 ?
A. The Sun's core is cooler than the surface.
B. The Sun's surface is hotter than the core.
C. The distance from the Sun to the Earth is less than 200 kms

D. It takes less than 8 minutes for the Sun's light to reach the Earth.

6. What is the effect of the big influence ?

- A. It creates the wrong assumption on the Sun.
- B. It makes a new culture in the world.
- C. It influences the new methods for scientists
- D. D. It is no other god for Egypt except Ra and Aztec

7. What is the synonym of the god in the last paragraph?

- A. The goddess
- B. The goodness
- C. The deity
- D. The Ra

Text 2.

V-Shaped Formation

(Pic The animalguys.us.)

When a goose flying, it claps its wings to give supporting power to other geese which are flying behind. They can feel that power, so that they don't need to break the airway like what the front goose does. Flying with V-shaped formation will help the group of geese to fly 75% further than if every goose flies alone. The geese like to fly in a group and even in V-shaped formation. This formation in symbol for them which means that they have a strong power in reaching their purposes.

When a goose flies alone, or out of formation, it's hard and difficult for that goose to fly a far distance, and usually that goose will be back to the group or try to join another group. Every goose will take benefit of a support power if they in a group formation.

The geese like to fly in a group and even in V-shaped formation. This formation in symbol for them which means that they have a strong power in reaching their purposes. When a goose flies alone, or out of formation, it's hard and difficult for that goose to fly a far distance, and usually that goose will be back to the group or try to join another group. Every goose will take benefit of a support power if they in a group formation. (<https://azbahasainggris.com>).

8. What is the text about?

- A. The Geese which fly in a group.
- B. The geese flew alone
- C. The v-shape formation of ducks
- D. The geese, duck and the symbol

9. Which one is better for the goose to go ?

- A. Making a group of 75 geese to fly together.
- B. Flying alone by finding its own power
- C. Flying in group by catching the others' power.
- D. Making V-shape when they are on the ground

10. What can be inferred from the paragraph above ?

- A. The geese's formation is usually in many shapes
- B. When they are in the group, they are stronger.
- C. The lonely goose no needs to join in another group of the geese.
- D. A goose can not join in the former group.

11. Which one is right ?

- A. A goose can fly in group or individual.
- B. A goose will not fly back to its group if it is late.
- C. Every goose has no benefit of joining in the big group.
- D. The right formation is V and W-shapes.

Text 3. Cats

Pic: mainecoonguide.com

Cats also called the domestic cat or house cat (with its scientific name: *Felis silvestris catus* or *Felis catus*) is a type of carnivorous mammal of the family Felidae. The word "cat" generally refers to a "cat" that has been tamed, but can also refer to the "big cats" such as lions and tigers.

Cats are considered as "perfect carnivore" with teeth and particular digestive tract. The first premolar and molar teeth form a pair of fangs on each side of the mouth that works effectively as a pair of scissors to tear the meat. Although these features also exist in the Canidae or dog, but these traits are better developed in cats.

Unlike other carnivores, cats eat almost non vegetable substance. Bears and dogs sometimes eat berries, roots, or honey as a supplement, while cats only eat meat, usually freshly killed prey. In captivity, cats can not adapt to a vegetarian diet because they can not synthesize all the amino acids

they need from plant material; it is in contrast with domesticated dogs, which commonly are fed a mixture of meat and vegetables and sometimes it can adapt to a completely vegetarian meal. (Taken from <https://www.englishiana.com>)

12. Cat is categorized into....

- A. Herbivorous
- B. Carnivorous
- C. Omnivorous
- D. Herbal

13. The part of cat functions as the tool for cutting is....

- A. Mouth
- B. Teeth
- C. Fur
- D. Head

14. A cat eats....

- A. Meat
- B. Vegetable
- C. Fruit
- D. Cereal

Number 15-20 refer to the following text.

Text 4.

Mobile Phone

Pic: Magazishnet.com

A mobile phone (also known as a wireless phone, or cellular telephone) is a very small portable radio telephone.

The mobile phone can be used to communicate over long distances without wires. It works by communicating with a nearby base station (also called a "cell site") which connects it to the main phone network. As the mobile phone moves around, if the mobile phone gets too far away from the cell it is connected to, that cell sends a message to another cell to tell the new cell to take over the call.

This is called a "hand off," and the call continues with the new cell the phone is connected to. The hand-off is done so well and carefully that the user will usually never even know that the call was transferred to another cell.

As mobile phones became more popular, they began to cost less money, and more people could afford them. Monthly plans became available for rates as low as US\$30 or US\$40 a month. Cell phones have become so cheap to own that they have mostly replaced pay phones and phone booths except for urban areas with many people. (<https://www.englishiana.comm>)

15. The other name of cellular phone is in the following, except :

- A. Mobile phone
- B. Iphone
- C. Portable phone
- D. Mobile phone

16. The synonym of 'portable' is....

- A. Movable
- B. Permanent
- C. Fixed
- D. Valid

17. The existence of the cellular phone replace....

- A. Phone box
- B. Wireless phone
- C. Coin box
- D. Pay phone

18. The urban area means....

- A. Rural
- B. Country
- C. Suburban
- D. Metropolitan

19. The main idea of the last paragraph is....

- A. The price of cellular phone is getting lower and lower.
- B. The price of cellular phone is getting higher and higher.
- C. No one needs wireless phone.

D. All children need games in the cellular phones

Number 20-25 refer to the following text.

Text 5.

Covid-19 or Coronavirus Disease-2019 is an infectious many countries and then in March 2020, WHO declared Covid-19 a pandemic.

This disease attacks respiratory system. Covid-19 also makes people who get infected experience several symptoms. The common symptoms are fever, dry cough, and tiredness. Some also experience aches, sore throat, diarrhea, conjunctivitis, headache, and loss of taste or smell disease caused by a new virus called SARS-Cov-2. This disease first identified in Wuhan, China, in the end of 2019. The virus widely spread over. Meanwhile the serious symptoms are shortness of breath, chest pain, and loss of speech. However, there are many who do not experience symptoms.

It takes about 5-6 days to the symptoms to show. However, the incubation period takes 14 days. People who has mild to moderate illness usually can recover without hospitalization. Meanwhile those who experience serious symptoms have to seek medical attention.

The virus spreads through the droplets when infected people sneeze or cough. Therefore, WHO gives the way to prevent infection such as washing hands regularly with soap and water, avoiding touching face, covering mouth and nose while sneezing or coughing, staying at home, refraining from smoking, and practicing physical distancing.

Source: World Health Organization (WHO)

20. Is Covid-19 a pandemic ?

- A. Yes, It is
- B. No, It is not
- C. Yes, It does
- D. No, It does not

21. The symptoms of Covid -19 is in the following , except :

- A. Sore throat
- B. Diarrhea
- C. Headache
- D. Bleeding

22. The following is categorized into the serious symptoms.:

- A. The chest pain
- B. The cough
- C. The fever
- D. The stomach

23. The incubation period is....

- A. More than 20 days
- B. Less than 10 days
- C. Around two weeks
- D. Not longer than one week.

24. After reading the text above What should we do if we have light illness?

- A. Staying at home
- B. Eating much
- C. Seeking medical treatment
- D. Nothing to do

25. The synonym of “refraining “ in the last paragraph is....

- A. Avoiding
- B. Continuing
- C. Keeping
- D. Doing
