IMMUNE SYSTEM

PICTURE	NAME
 A microscopic image showing several macrophages. These cells are characterized by their large, round, pinkish-red cytoplasm and multiple, dark purple, lobed nuclei. They are surrounded by numerous smaller, pale pinkish-red cells, likely red blood cells.	MACROPHAGE
 A 3D digital illustration of a lymphocyte. The cell is depicted with a large, spherical, light blue nucleus and a surrounding, irregular, greenish-blue cytoplasm. It is set against a dark red, textured background. A small, green, spiky structure is visible in the upper left corner, connected to the cell by a thin line.	LYMPHOCYTE
 A microscopic image showing a field of neutrophils. The cells are characterized by their large, round, pinkish-red cytoplasm and a single, large, dark purple, multi-lobed nucleus. They are surrounded by numerous smaller, pale pinkish-red cells, likely red blood cells.	NEUTROPHILS
