### I. Read the passage and choose the correct answer to each of the questions.

#### Sculptures under the sea

Tourists diving or snorkeling off the beautiful Yucatan Peninsula near Cancun, Mexico might not believe their eyes. That's because there are amazing sculptures of men, women and children up to 8 meters below the waves.

Sea creatures will soon share the bottom of Mexico's Caribbean Sea with the world's largest underwater sculpture park! Eventually, there will be 400 life-size sculptures including people holding hands in a circle, cyclists, office workers and pets. The sculptor, Jason De Caires Taylor, casts his statues from local people, so divers might even see someone **they** recognise.

Jason hopes that his sculptures will encourage people to think about the environment. Pollution and hundreds of thousands of visitors per year are damaging Mexico's coral reefs. Jason wants people to swim to the underwater sculpture park instead of the damaged reefs. He creates the statues from cement that attracts sea creatures and encourages coral to grow on them.
