Electrician 1: Hi, I heard _____ problem with the wiring in the office building. Is it true?

Electrician 2: Yes, _____ an issue with the faulty circuit breaker. There is a short circuit occurred earlier today.

Electrician 1: That sounds serious. Is there a spare breaker available in the stockroom?

Electrician 2: Yes, _____ a new one that was delivered yesterday. I'll go and get some right away.

Electrician 1: Great. While you're at it, can you also check if _____ a power surge protector for the server room that is functioning properly?

Electrician 2: Sure, I'll inspect it. By the way, _____ an important safety reminder: whenever working with electricity, remember to wear _____ insulated gloves and goggles.

Electrician 1: Absolutely, safety should never be compromised. Also, let's make sure _____ warning signs posted around the area to alert others.

Electrician 2: Agreed. _____ electrical work that can be hazardous, so it's crucial to follow proper procedures.

Conversation II

Electrician 1: Hey, I'm preparing for the upcoming electrical maintenance in the building. Do we have _____ spare fuses in the inventory?

Electrician 2: Yes, there is a box of spare fuses that should be available in the storeroom. I'll check the exact quantity for you.

Electrician 1: That would be helpful. Also, do we have _____ circuit testers? I want to ensure the proper functioning of all the outlets.

Electrician 2: Yes, _____ circuit testers are stored in the toolbox. I believe there is a tester missing, but we have _____ extra ones.

Electrician 1: Alright. And _____ electrical tape is left? We may need _____

Electrician 2: I'm not sure _____ tape we have, but I'll check. If the tape is insufficient, we can order _____ more.

Electrician 1: Sounds good. Lastly, let's review the safety protocols with the team. It's crucial to ensure everyone understands the importance of following them.

Electrician 2: Absolutely. We can conduct _____ safety briefing before starting the work to address _____ potential risks.

Electrician 1: That's a good idea. While we're at it, let's also assess the number of fire extinguishers available. We need to make sure _____ are accessible throughout the building.

Electrician 2: Agreed. I'll take note of the extinguishers we have and check the expiration dates. We might need to order _____ new ones if necessary.

Electrician 1: Perfect. Lastly, can you confirm the length of the extension cords we have? I want to determine if the cords are suitable for the upcoming electrical work.

Electrician 2: Sure, I'll measure the cords and let you know the length. We might need to purchase _____ longer ones if the current ones are inadequate.
