How Electricity is made. (01 How Electricity is made QUIZ)

Transcription of the video

1. In **thermal power plants**, what is used for moving **turbines**: A) Water B) Steam C) Wind D) Don't know	2. **Electricity generation** with help of **wire coil** and a **magnet** is known as… A) Electromagnetic Induction B) Fission C) Fusion D) I don't know
3. **Uranium** is used in producing… A) Nuclear Electricity B) Hydro Electricity C) Thermal Electricity D) I don't know	4. The **plants** where **coal** is used to produce **electricity** is known as… A) Nuclear Power Plant B) Hydro Power Plant C) I don't know D) Thermal Power Plant
5. A **turbine** is not used in producing… A) Hydro-electricity B) Wind Energy C) Nuclear Energy D) Solar Energy	6. **Fossil fuels** are not used in producing… A) Thermal Electricity B) Nuclear Electricity C) I don't know D) Solar Electricity
7. The **turbine** is useful for… A) Producing Electricity B) Moving Generator C) Nuclear Fission D) I don't know	8. **Electricity** produced at **power plants** situated at **dams** is known as… A) Nuclear Energy B) Bio-energy C) Hydro-electricity D) I don't know
9. **Solar energy** is produced with help of following **cells**… A) Animal Cells B) Nuclear Cells C) Photovoltaic Cells D) I don't know	10. A **generator** does not have a… A) Wire Coil B) Magnet C) Fuel Pump D) I don't know
