Name

You can find equivalent fractions quickly by multiplying the numerator and denominator by the same number.

Mathematics

Equivalent Fraction to its simplest form, divide the numerator and denominator by the same amount.

### To cancel a fraction to its simplest form, divide the numerator and denominator by the same amount.

#### To Tip
Learn your times tables thoroughly to make simplifying fractions easier to do.

Jim made 50 dog treats to sell at the school fair. He sold 7/10 of the dog treats. How many dog treats did Jim sell?

$$\frac{7}{10} = \frac{?}{50}$$
  $\frac{7}{10} = \frac{7 \times 5}{10 \times 5} = \frac{35}{50}$   $\frac{35 \text{ dog treats}}{}$ 

The fractions tells us that Jim sold 35 out of 50 dog treats he made

## Solve the word problems.

1. Carmen's dad grilled 30 burgers for her volleyball team's picnic. He put cheese on 2/5 of the burgers to make cheeseburgers. How many cheeseburgers did Carmen's dad make?

Answer cheese burgers
