

ÁREA DEL TRAPECIO

✓ Calcula el área de los siguientes trapezios:

 $\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$ A = m²	 $\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$ A = cm²
---	---

 $\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$ A = m²	 $\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$ A = cm²
---	---

$$\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$$

$$A = \square \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$$

$$A = \square \text{ m}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$$

$$A = \square \text{ m}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$$

$$A = \square \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$$

$$A = \square \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\square + \square) \times \square}{\square} = \frac{\square}{\square}$$

$$A = \square \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$A = \boxed{} \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$A = \boxed{} \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$A = \boxed{} \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$A = \boxed{} \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$A = \boxed{} \text{ cm}^2$$

$$\frac{(B + b) \times h}{2} = \frac{(\boxed{} + \boxed{}) \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$A = \boxed{} \text{ cm}^2$$
