

I. Suma de fracciones homogéneas

$$\frac{5}{6} + \frac{6}{6} =$$

$$\frac{8}{7} + \frac{9}{7} =$$

$$\frac{15}{6} + \frac{16}{6} =$$

$$\frac{10}{11} + \frac{14}{11} =$$

$$\frac{20}{12} + \frac{4}{12} =$$

$$\frac{9}{8} + \frac{9}{8} =$$

$$\frac{17}{30} + \frac{13}{30} =$$

$$\frac{2}{4} + \frac{2}{4} =$$

$$\frac{13}{2} + \frac{13}{2} =$$

II. Resta de fracciones homogéneas

$$\frac{6}{6} - \frac{5}{6} =$$

$$\frac{15}{12} - \frac{6}{12} =$$

$$\frac{20}{14} - \frac{10}{14} =$$

$$\frac{30}{19} - \frac{23}{19} =$$

$$\frac{40}{6} - \frac{25}{6} =$$

$$\frac{14}{5} - \frac{13}{5} =$$

$$\frac{19}{2} - \frac{9}{2} =$$

$$\frac{4}{4} - \frac{1}{4} =$$

$$\frac{33}{7} - \frac{3}{7} =$$
