

Mass

List the objects from the heaviest to the lightest

How much did the book, the pen and the cart weigh?

Object	Weight
Book	
Pen	
Cart	

Length

How could you calculate the length of the different objects?

How big do you think each of the objects is? write a number for each object

Compare your estimates with the actual lengths.

Temperature

What temperature is each container?

Container	Temperature
Container 1	
Container 2	

What happened to the temperature of the glass of water when you put the ice inside?

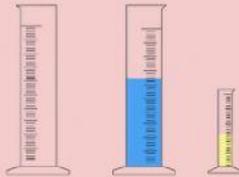

Time

- How many jumps can you do in 1 minute?
- How many claps can you give in 1 minute?
- How many times can you write your name in 1 minute?

Write down the results of each question in the next table:

Activity	Number per minute
Jumps	
Claps	
Write my name	

Volumen

How do you think you could calculate the volume of these objects with the elements provided?

What do you observe when you drop each of the objects into the container with water?
