

Soccer or Fractions

Seth was outside playing soccer. He practiced juggling and kicking the ball into the goal.

Seth practiced everyday. He always wore the jersey of his favorite team. His dad told Seth that if he got an A on his next math test, he would get him tickets to see their game!

Seth wanted to go so badly, but his test was on fractions. He did not understand fractions. The next day at school he asked his teacher Mr. Fulder for help. Mr. Fulder told Seth he could stay after school and he would go through the study guide with him. Seth listened and wrote down everything Mr. Fulder said. Mr Fulder also gave Seth some extra problems to bring home to practice. Seth went home and over the next few days practiced his fractions.

When it was time to take the test, Seth was ready! He took his test and got an A! Seth was so happy to know fractions and to see his soccer game.

Summarize

Somebody Who is the main character?	
Wanted What do they want?	
But What is the problem?	
So What steps do they do to fix the problem?	
Then How did it end?
