

TOPIC:**COMPONENTS OF ECOSYSTEM**

ACTIVITY: 1 Choose "TRUE" or "FALSE" for each of the given statements.

- Corals look like stones but actually these are plants. TRUE / FALSE
- Consumers breakdown the dead materials and release nutrients. TRUE / FALSE
- All biotic components are living things. TRUE / FALSE
- Plants prepare their food by using water, oxygen and sunlight. TRUE / FALSE
- Mushroom is an example of bacteria. TRUE / FALSE
- Only biotic components of an environment are responsible for maintaining a balance in an ecosystem. TRUE / FALSE

ACTIVITY: 2 Draw a line to match the key word with its correct description.

Decomposers

Live in form of a colony and also known as rainforest of oceans.

Corals

Breakdown the dead bodies of plants and animals and also known as nature's recyclers.

Algae

Get energy by eating producers and other animals.

Consumers

Prepare their own food by the process of photosynthesis and also a major source of food for the aquatic animals.
