## Comparing Decimals

***To compare decimals follow these steps:***

- Rewrite the numbers under each other and line up the decimal points.
- Start with the digit on the left and compare to see which is bigger.

**Fill in the blanks with the correct sign ( $<$ ,  $>$ ,  $=$ )**

**Example:**  $0.4 ( \quad ) 0.23 = 0.4$

**0.23**

***The 4 in the tenths place is greater than the 2 in the tenths place.***

**Therefore  $0.4 ( > ) 0.23$**
