Teen inventor's tips to make you creative

When Ann Makosinski was growing up in Canada, she didn't play video games and seldom watched television – only half an hour on weekends when her schoolwork was done. Instead, she listened to 19th century opera and 5 classical Indian music, learned piano and violin, watched silent films at home and played with electronic gadgets.

Now 19 years old, Makosinski has won several major prizes for her inventions. These include a flashlight that works with the heat of the human hand and a coffee cup 10 that uses heat to charge a phone.

Our news reporter talked with her to get some advice about how to be creative from an early age and how to turn a good idea into an invention. Here are some of her tips.

[– 28 –]

Unlike most of her friends, Makosinski did not have a cellphone at high school. She says she 15 concentrated better on her studies without it. She suggests that creative people who want more time to invent go on a technology-free diet for a week or two. "In this way, they will have more spare time."

[– 29 –]

Makosinski chose to study English literature at university. She explains that it is important to 20 develop an interest in both art and science. "If you make something but the invention does not look good to the customer, nobody is going to buy it."

[– 30 –]

According to Makosinski, one of the hardest parts of creating something is not giving up even when the task is difficult and you are not good at it.

25 **[– 31 –]**

Makosinski believes that you must concentrate on a project. "You should not listen to loud music or go to social get-togethers."

[– 32 –]

Makosinski says that when you start to create something you must not think about the goal 30 or the dream but instead, accept you might not be successful. "The first time you try to make something, it probably won't work but you learn more when you fix a mistake than when you get it right immediately."

Text C — Teen inventor's tips to make you creative

Choose the correct answer (lines 1–17).

24. How did Ann Makosinski spend some of her leisure time?

- A. She enjoyed video games.
- B. She listened to pop music.
- C. She played musical instruments.
- D. She went to the cinema.

25. Both of Ann Makosinski's inventions work with...

- A. coffee.
- B. flashlights.
- C. phones.
- D. heat.

26. According to the text, the reporter talked with Ann Makosinski to...

- A. hear details about her inventions.
- B. find out more about her childhood.
- C. get tips on how to invent something.
- D. learn about her life at high school.

27. What does the phrase "go on a technology-free diet" (line 16) mean in the text?

- A. Use technology at meals.
- B. Use no technology.
- C. Use free technology.
- D. Use technology for school work.
