

UNIT 2 FOOD CHAIN 1

1. Read and complete the sentences with the words/ phrases in the box:

photosynthesis	plant	plants and other animals	sunlight	producers, consumers, and decomposers
grasses	predators	trees	food	carbon dioxide
consumers	living things get the food	water and minerals	sugar	produce
		prey		

All living things on Earth need _____ for energy.

The food chain explains how _____ they need.

All living things are divided into three main groups: _____.

Every _____ is a producer. Producers are living things that _____ their own food.

Some examples of producers are _____, _____, and shrubs.

Plants make their own food through a process called _____. They use _____ from the Sun, _____ from the soil, and _____ from the air to produce oxygen and _____.

Animals are called _____ because they cannot make their own food. They need to consume _____.

Animals that eat other animals are called _____. Animals that are eaten by other animals are called _____.

2. Write "producer" / "consumer" under the pictures:
