

Ecological problems

1. What are your associations with the picture? Describe it orally.

2. Vocabulary Revision. Translate the words into Russian. Make up sentences with these words orally

issues	браконьеры
biodiversity	Среда обитания
pollution	Углеродный след
Resource depletion	Истощение ресурсов
Carbon footprint	Разнообразие видов
habitat	загрязнение
poachers	проблемы

3. Reorder the words, make up questions. Interview your partner.

<u>ecological</u>	<u>are</u>	<u>What</u>	<u>urgent</u>	<u>most</u>	<u>Problems</u>	<u>the</u>

<u>know</u>	<u>you</u>	<u>in</u>	<u>Do</u>	<u>animals</u>	<u>danger</u>	<u>any</u>

<u>can</u>	<u>the</u>	<u>you</u>	<u>how</u>	<u>environment</u>	<u>protect</u>

4. Match the words with the right definitions. Give your own definitions orally

pollution	is a change in the statistical properties of the climate system that persists for several decades or longer—usually at least 30 years.
Climate change	is the introduction of contaminants into the natural environment that cause adverse change
Global warming	is the removal of a forest or stand of trees from land that is then converted to non-forest use.
deforestation	is the unusually rapid increase in Earth's average surface temperature over the past century primarily due to the greenhouse gases released by people burning fossil fuels.
Animals extinction	An extermination of animal species

5. What do all these animals have in common? Can you add any other species?

6. Prepare for the project “Ecological problems”. Use the following key words for help:

1. The main ecological problems
2. Animals in danger
3. Solutions
4. My contribution
