

Read the text and answer the question no 1-6!

Tiger

Tiger is the largest living cat species and a member of the genus *Panthera*. Its scientific name is *Panthera Tigris*.

There are six different subspecies of tigers. All of which are native to Asia these include Bengal tiger, Malayan tiger, Siberian tiger, Indochinese tiger, South China tiger, and Sumatran tiger. It is most recognizable for its dark vertical stripes on orange fur with a white underside but, each tigers have their own pattern on their fur, and their tails help them to keep their balance.

Tigers are solitary hunters, and generally search for food alone at night. They quietly stalk their prey until they are close enough to pounce then they kill their victim with a bite to the neck or back of the head. They mainly feed on large mammals such as, deer, wild pig, antelope, and buffalo. All six of the tiger subspecies are listed as endangered in 2022. The clearing of forest for agriculture and timber, as well as the building of road networks and other development activities, pose serious threats to tiger habitat.

1. Which statement is **true** according to the text?
 - a. Tigers usually find a food at morning
 - b. Tiger has another name which is *Panthera Tigris*
 - c. Siberian tiger live in Sumatra
 - d. Tigers use their fur to keep their balance
2. Which statement is **false** according to the text?
 - a. Tigers usually eat grass and fruit
