 C. Yes, they do! D. They were fine, thanks
25. The old building.....20 years ago.
 A. is built B. were build C. was built D. were built

VI. Read the text below. Choose the correct answer.

Most sore throats are caused by an infection which treatment with antibiotics cannot cure. But with simple remedies, the patient normally gets better in 4 or 5 days.

Tonsillitis, however, usually starts with a sore throat which causes pain on swallowing. With children - and some adults - there may be a fever and the patient is obviously not feeling well. It may be possible to see white spots on the back of the throat.

Sometimes a sore throat may occur with the common cold, and with influenza, there may be dryness of the throat, pain on coughing and loss of voice.

Treatment:

Aspirin: To help relieve the pain on swallowing and the fever (if there is one). Use aspirin tablets dissolved in water so that the patient can gargle before swallowing. Repeat the treatment every 4 hours.

Drink: Encourage the patient to drink plenty.

Food: Food should not be forced on a patient who does not want to eat.

Steam: If there is pain in the throat on coughing, breathing in steam may help.

Children: Young children, who may not be able to gargle, should be given aspirin dissolved in water every 4 hours in the right dose for their age.

At one year: A single junior aspirin.

At five years: Half an adult aspirin.

At eight years: One whole adult aspirin.

When to see the doctor:

If the sore throat is still getting worse after 2 days.

If the patient complains of earache.

If the patient's fever increases.

If the parent of patient is worried.

1. According to the passage, it would appear that most sore throats.....
 - A. require an immediate treatment with an antibiotic
 - B. respond to treatment with an antibiotic
 - C. rarely turn out to be serious illnesses
 - D. result in tonsillitis even when treated
2. One of the signs of tonsillitis can often be.....
 - A. difficulty in swallowing food
 - B. pain in the chest when coughing
 - C. white spots on the neck
 - D. earache during the first days
3. In order to treat a sore throat, one should.....
 - A. prevent the patient from eating too much
 - B. give the patient 4 aspirin tablets every hour
 - C. make certain the patient drink plenty of liquid
 - D. make the patient gargle with hot liquid
4. You should call the doctor if.....
 - A. the infection spreads to other people
 - B. swelling occurs around the ears
 - C. the patient's throat is still sore after two days
 - D. the patient's condition continues to worsen
5. What difference is there in the way adults and young children should be treated with aspirin?
 - A. Young children should not be allowed to gargle with it.
 - B. Adults should be given tablets to swallow whole.
 - C. Young children should be given aspirin more often than adults.
 - D. Adults should be given larger doses of aspirin than children.
