Build a recession-proof tech workforce

Conclusion

A global recession is _____ to stop investing __ your talent. It's _____ the opposite. **Technologists, especially _____ with cybersecurity and cloud computing _____, are in _____ demand than ever before.** And there's no _____ that will change in the ____ future. The only _____ solution is to develop tech skills for _____ and your team.

This is _____ more critical as leaders shift _____ a multicloud-as-default _____, _____ requires technologists to have a broad and deep _____ of multiple cloud technologies and the ways those _____ impact overall security. **It's not a one or _____ decision anymore. Technologists need to speak to both.**

The only ____ that's going to happen is if leaders give their technologists the time, space, and _____ they need to adequately train _____ for the next wave of technology innovation.
