

Feb. 15-18 Station 6: Evaluate Cause and Effects

Directions: Complete the table below by choosing the effect that occurs based on the cause, then decide if that leads to either an increase or decrease in biodiversity.

Cause	Effect	Does this increase or decrease biodiversity?
Overhunting		
Deforestation		
Heavily fertilizing crops		
Conservation		
Oil spills in the ocean		
Habitat Management		
Replanting Trees		
Using dangerous pesticides
