PROCESS PRACTICE

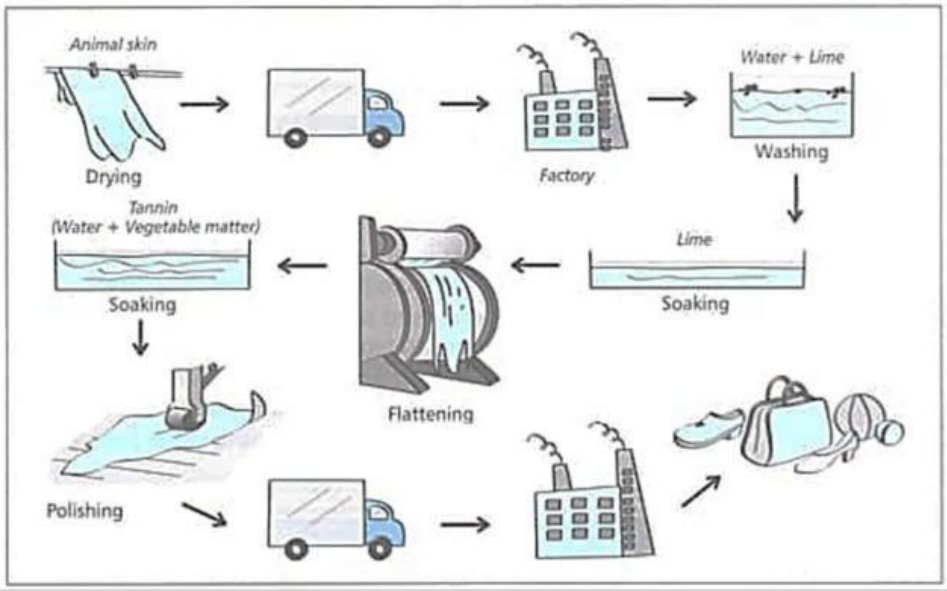

For some questions, choose the best answer. For the others, fill in each blank by using one of the given words.

You should spend about 20 minutes on this task.

> ***The diagram below show how leather goods are produced.***
>
> ***Summarise the information by selecting and reporting the main features, and making comparisons where relevant.***

Write at least 150 words.

A method of producing leather goods

Subsequently	**following**	**through**	**view**
ensure	**consumption**	**depict**	**crucial**

The pictures ..... the process by which leather products are manufactured.

Overall/ Overview, it can be noticed from the diagram that there are totally 11 steps in this process, beginning with the drying of animal skin and ending **at / with** making finished products.

In detail, the first step is that the animal skin is dried in the sun, after **which/ that** it is transported to factories. Then it goes .....the washing stage in water and lime with a .....to removing dirt on it. ....., having been soaked in lime again, the skin is flattened **so that/ in order to** it is ready for the next steps. Following **this/ which**, the flattened skin is soaked in tannin, **which/ that** is a mixture of water and vegetable matter. The .....stage is **polishing/ the polishing** of the skin, which is one of the most .....steps since it helps .....the quality of the finished product. Finally, it is moved to factories, **where/ which** leather products, such as shoes, handbags, or balls, are made for public .....
