Globalization effects

I am John, I am 20 years old and I was born in a globalized world. So, I am in favor of it. I think that globalization brings very good benefits and positive impacts; specially related to economic growth. Also, it helps people to move to one country to another thank to the transport technologies and the open barriers; that is to say, people can travel by plane, people can travel by ship, etc

I am Trish, I am 45 years old and I am seeing the way in which globalization is constantly changing us. In the past everything was different. Now We don't have the chance to sell local products, we don't have the chance to sell what we cultivate on our soil. In addition, as employees, we cannot work independently, wecannot work in small factories; we can just work in the multinational ones. So that,I am anti-globalization.

I am Ryan, I am 15 years old and I see that Globalization can be a hero or it can be a villain. On the positive aspect, I like the fact that people can listen to music from different countries or I like that we can see different content at TV from different countries. On the negative aspect, I don't like the fact that developed countries try to invade countries with their products and to use mass media to force developing countries to think like them
