2.- Read and match the parts of the male reproductive system with its functions

Prostate gland

The pouch of skin that contains the testes.

testes

The male reproductive organ, through which urine and semen pass.

Vas deferens

A pair of glands that also produce some of the fluid part of semen.

scrotum

A gland that produces some of the fluid part of semen.

penis

A pair of ducts leading from the testes to the seminal vesicles, through which the sperm travel.

Seminal vesicles

A pair of oval-shaped glands that produce sperm.
