

Sequential order-, the order or way things happen, or the pattern of a subject, example it could be 1, 2, 3 or A, B, C

Words that will give you clues when events are in sequential order: first, second, third, next, then, finally, following, after, before, last, youngest, oldest, new

Read the story below and put the events in sequential order (how the events happened).

Stacy and Rex take a walk to the park.

Stacy walked from the couch to the window 5 times. The rain had finally stopped. It had been raining for hours. Now the sun was shining and Stacy was restless.

Stacy sighed, she really wanted to do something. Rex walked to the kitchen to lap up some water. He returned to his rug wagging his tail.

At least he is happy Stacy thought. Stacy went to her room to get her backpack. She gathered her crayons and art paper. She sat at the kitchen table and drew pictures of Rex, the park and sunshine.

Rex started to whine.

Stacy patted his head and said, "I know, I am bored too".

Stacy came up with a great idea. She was going to take walk with Rex. She would take Rex to the neighborhood park.

"Rex, let's go to the park". Rex sat up and his tail wagged rapidly.

"Let's go!"

What does Stacy need to walk Rex to the park?

gloves, leash, galoshes, scarf, rain coat

Put the events in sequential order

(Hint what did Stacy do in the story)
