**Read the text:**

***China has the largest population in the world, with over 1.4 billion people living in the country. However, India is catching up quickly and is expected to surpass China as the most populous country in the world by 2027. This growth is due in part to India's younger population, as well as its high birth rate. Despite this, China remains the world's second largest economy, and is predicted to overtake the United States as the largest economy in the world by 2030.***

**Answer the questions using full sentences:**
