

\_\_\_\_\_ If you have a Hearing Assistive Technology unit to use in school, it will help you hear your teacher better!

\_\_\_\_\_ Sitting close to whoever is talking, or the speaker, is the best place! The further away from the sound source the harder it will be to hear what is being said.

\_\_\_\_\_ When you are watching videos or movies in school, ask for this to be turned ON! This will put all the words at the bottom of the screen. It makes it easier to follow along.

\_\_\_\_\_ When you are in class and all the lights are turned off it is hard to read the teacher's lips and facial cues. It is ok to **ask** to have a few lights turned on!

\_\_\_\_\_ When you don't hear what someone says, ask for them to repeat it (say it again). **You** can also rephrase what you heard and ask if that is correct.
