Technology and Time

- Match the events to the appropriate unit of time to measure them.

days	seconds	years	microseconds
			
the lunar cycle	a lightning bolt	the orbit of Neptune	running 100 m

- Drag and drop the events into the correct column.

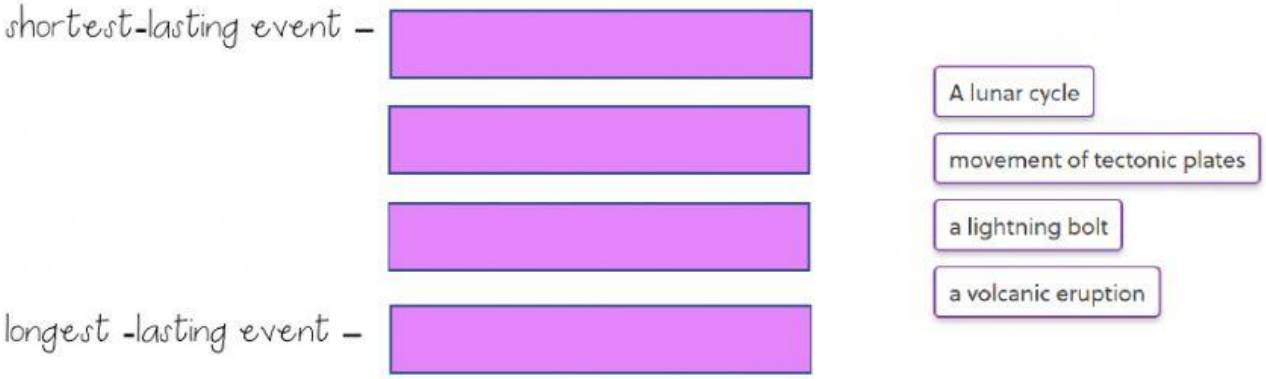

the formation of the universe | when dinosaurs walked the Earth | a heartbeat | a sneeze | the flapping of a bird's wings | the formation of mountains

short period of time (under a second)	long period of time (more than a year)

LIVEWORKSHEETS

- Drag and drop the different phenomena in order according to their duration, from the shortest-lasting event (TOP) to the longest-lasting event (BOTTOM)

- Read the definitions and write the word or words that are being described.

One of the first types of clocks to be made.

_ r _ _ _ _ _ _ _ _ _ _ _ _ _ c _

Regions where the same time is used.

_ _ _ _ _ _ o _ _ _

The most accurate time-keeping devices.

_ _ _ m _ _ _ _ _ _ _ _ _ s

A clock that has hour and minute hands. _ _ _ _ _ o _

A piece of this oscillates exactly 32,768 times per second. _ _ a _ _ _

A clock with a screen that displays time. _ _ _ _ _ _ a _
