

Write Weathering, Erosion or Deposition for each scenario below.

1. Wind blowing sand across the desert.
2. Water beating against a cliff and wearing the rock away.
3. Waves crashing against the beach and dropping sand.
4. Sediment becoming layers at the bottom of the ocean.

5. A glacier scraping against rocks and breaking them.
6. A mudslide taking mud down a hill.
7. Water freezing inside a rock and cracking it.
8. Sand dunes form in the desert.
9. Water carrying sediment down a river.
10. Caves form in cliffs from the constant beating of waves.
