Dry

Flat

Land: tierra

What are landforms?

Earth is made of many layers. The top layer of earth is called its crust. Earth's crust can be many different shapes.

**THE DIFFERENT SHAPES OF EARTH'S CRUST ARE
CALLED LANDFORMS.**

When Earth's crust moves, new landforms are made. Landforms show how Earth's crust can change .

Types of landforms

Continental Landforms

The continental landform is Earth's surface changes.

Desert: A dry area of land with few plants and little water.

Plain: A very large, flat area of grassy land.

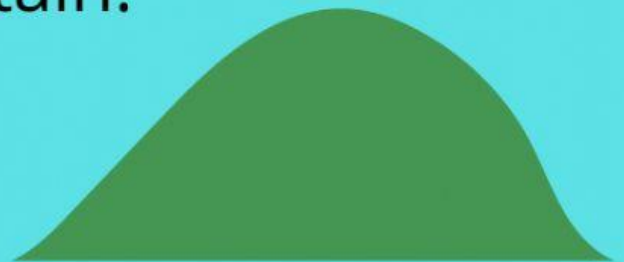

Volcano: A mountain with an opening on the earth's crust that allows molten lava and gases to

Plateau: a large area of flat land that is higher than the land around it

Hill: a mound of raised land that is smaller than a mountain.

Valley: low area formed between mountains or hills.
