

MULTIPLICACIÓN DE FRACCIONES

1. Resuelva los ejercicios planteados paso a paso, simplifique las respuestas a su mínima expresión si es posible.

$$1. \frac{3}{11} \times \frac{2}{7} \times \frac{7}{3} = \frac{\boxed{}}{\boxed{}}$$

$$5. \frac{15}{7} \times \frac{2}{9} \times \frac{21}{10} = \frac{\boxed{}}{\boxed{}}$$

$$2. \frac{1}{4} \times \frac{2}{3} \times \frac{18}{11} = \frac{\boxed{}}{\boxed{}}$$

$$6. \frac{7}{4} \times \frac{6}{7} \times \frac{3}{7} = \frac{\boxed{}}{\boxed{}}$$

$$3. \frac{1}{7} \times \frac{7}{11} \times \frac{10}{3} = \frac{\boxed{}}{\boxed{}}$$

$$7. \frac{2}{7} \times \frac{1}{4} \times \frac{1}{2} = \frac{\boxed{}}{\boxed{}}$$

$$4. \frac{15}{8} \times \frac{4}{9} \times \frac{1}{2} = \frac{\boxed{}}{\boxed{}}$$

$$8. \frac{7}{8} \times \frac{16}{11} \times \frac{3}{4} = \frac{\boxed{}}{\boxed{}}$$
