

To find the area of a rectangle, use the formula **length x width = area**.  
This formula is often written as  **$l \times w = A$** .

The rectangle pictured here has a length of 10 cm and a width of 8 cm.

$l = 10$  cm

$w = 8$  cm

$10 \text{ cm} \times 8 \text{ cm} = 80 \text{ cm}^2$

Note that the area's unit is written as  $\text{cm}^2$ .

This is said as "square centimeters" or "centimeters squared".

Find the area of each rectangle.
