

Grade 11 General Term 2 (2020-21)

READING SKILLS CHECK 1

Put these words in order from smallest to largest

Country – Solar System – Galaxy – planet

1 -

2 -

3 -

4 -

Compete the paragraph with words from the box

Galaxy – Gravity – Solar system – planets – Satellite – astronaut

There are eight planets in the solar system. These are part of the solar system that contains billions of stars, systems and lots of space dust. Not all planets have atmospheres like The Earth, believe it or not – objects floats on some other planets. Travel to space to try to explore the different regions out there and to learn new information. Governments and space programs send satellites to discover new things about the fantastic world of space.

My best wishes of success
